Biomechanical properties of the canine knee articular cartilage as related to matrix proteoglycans and collagen, 157
Biomedical engineering at the University of Cape Town and Groote Schuur Hospital, 37
Blood, influence of, on the strength of the bone–cement interface, 131
Blood sugar levels, 92
Bone:
cancellous, 71, 163
trabecular, 23, 169
long, 54, 83
Bone cement, fibre reinforcement of, 31
Bone–cement interface, strength of, 131
British Technology Group, 87
British Standards:
BS 3221 *Medical measures*, Part 7, 46
BS 4843 *Sterile intravascular cannula units for single use*, 46
BS 5724 *Medical electrical equipment*, Part 2, 93
BS 6083 *Hearing aids*, Part 9, 46
BS 6828 *Dental rotary instruments*, 45
BS 6834 *Specification for active anaesthetic gas scavenging systems*, 45
BS 6859 *Operating tables*, 93
BS 6871 *Specification for heat-sealable pouches and tube material converted from transparent plastics film and paper for steam sterilization for medical use*, 46

Calf stimulator, 49
Can the weight-bearing capacity of the femoral neck be estimated by physical measurements on the greater trochanter?, 59
Cancellous bone, 71, 163
Canine knee articular cartilage, biomechanical properties of, 157
Cape Town, University of, 37
Cartilage, articular, of the canine knee, 157
Casting materials, 63
Cataract extraction instrument kit, 48
Catheters, urological, 50
Cement, bone, 31
Cement layer, stress in, 83
Cementing technique, influence of, on the strength of the bone–cement interface, 131
Ceramic total hip replacement, 3
Charnley total replacement hip joints, wear and creep in, 111
Cheirometer, computerized, 17
Chemistry analyser, 140
Children, disabled:
Go-Karts for, 46
robot to help, 88
Choroidal melanoma, arradiation of, 77
Clipper, surgical, 42
Collagen, 157
Communication (Synopsis), 82
Compression testing, 23
Compression properties of soft tissues (Synopsis), 84
Computerized Cheirometer for assessing grip-strength and classification of rheumatoid patients, 17
Computerized lens manufacture, 44
Control of upper limb prostheses – the Edinburgh philosophy (Synopsis), 82
CT Scanner, 89
Cushion drive for invalid lifts, 44

DD 157 *Methods for the determination of mechanical properties of metal knee joint and side member assemblies for use in lower limb orthoses*, 46
Deep venous thrombosis, detection of, 82
Density and temperature effects on some mechanical properties of cancellous bone, 163
Dental rotary instruments (BS 6828), 45
Denture re-liner, quick-setting, 143
Design and development of a versatile hip joint simulator and a preliminary assessment of wear and creep in Charnley total replacement hip joints, 111
Development of modular wrist, hand, and finger orthoses (Synopsis), 81
Development of the embedded strain gauge technique with application to the investigation of stress in the cement layer underlying a tibial plateau (Synopsis), 83
Disabled, seating for, 82
Disabled children:
Go-Karts for, 46
robot to help, 88
Dog lungs, 189
Dogs, 195
Donald Julius Groen Prize, 50

Embedded strain gauge technique, 83
Endolite prostheses, 41, 141
Evaluation of prosthetic devices in vivo and in the laboratory, 99
Eye testing, 85
Experimental stress measurement and mechanical testing of total hip replacements (Synopsis), 83
External fixation system, 46
External fixators, 11
Exxon/IMechE Tribology Award, 199

Femoral component in total hip replacement, 7
Femoral components of total hip replacements, rotational movement of, 127
Femoral neck, weight-bearing capacity of, 59
Fibre reinforcement of bone cement, 31
Fixation system, external, 46
Fixators, external, 11
Flow, steady and pulsatile, 181
Fluid dynamics, 181
Foot pressures and areas of contact (Synopsis), 81
Fracture casting materials, 63
Fracture healing monitoring, 11
Fractures, 85
Functional properties of artificial hip joints, 101

Gait analysis, 3
Gas transfer in dog lungs during high-frequency ventilation, 189
Go-Karts for disabled children, 46
Greater trochanter, 59
Grip-strength indices, assessment of, 17
Groote Schuur Hospital, 37

Handimobile, 43
Hearing aids (BS 6083: Part 9), 46
Hearing aids, rubber components in, 44
Heat gun, 93
High-frequency ventilation, 189, 195
Hip:
prosthetic, 119
replacement, 3, 7, 83, 111, 127
Hip joint:
artificial, 101, 199
simulator, 111
Hip osteoarthritic patients, 3
Hip surgery, 82
Hospitals, safe temperature control for, 42
Human hand, artificial, 143

Imager, laser, 89
Imaging, magnetic resonance, 87
In vitro fluid dynamics of the St Jude valve prosthesis in steady and pulsatile flow, 181
In vivo evaluation of prosthetic devices, 99
Invalid lifts, cushion drives for, 44

Joint, ankle, 71
Joint, hip, artificial, 101, 199

Knee, canine, 157
Knee prosthesis, meniscal, 135
Knee replacement, total, 149
Knee screener, kinematic, 84

Laboratory evaluation of prosthetic devices, 99
Laser imager, 89
Laser interferometric microscope, 93
Lasers, medical, 90
Leg, artificial, 41, 141
Lens manufacture, computerized, 44
Long bones, 54, 83
Lower-limb-operated manipulator, 81
Lungs, dog, 189

Magnetic resonance imaging, 87
Magpie – a lower-limb-operated manipulator (Synopsis), 81
Marrow, mechanical function of, in long bones, 54
Matrix proteoglycans, 157
Mechanical measurements of the technical constants of trabecular bone, 169
Mechanical properties of cancellous bone, density and temperature effects on, 163
Mechanical properties of trabecular bone by a non-destructive compression testing approach, 23
Mechanical testing of total hip replacements, 83
Medic Design Awards, 87
Medical electrical equipment (BS 5724: Part 2), 93
Medical lasers, 90
Medical measures (BS 3221: Part 7), 46
Melanoma, choroidal, 77
Membrane switches, 142
Methods for the determination of mechanical properties of metal knee joint and side member assemblies for use in lower limb orthoses (DD 157), 46
Microscopy, laser interferometric, 93
Minns meniscal knee prosthesis, wear and contact stress studies of, 135
Modern fracture casting materials, a comparative evaluation of, 63
Modular orthoses, 81
Monitoring:
neonatal, 91
patient, 91
Muscles, abdominal, 83
Musgrave Footprint, 49

Natural rubber in artificial legs, 41, 141
Neonatat monitoring, 91

Occupational therapy, 93
On the mechanical function of marrow in long bones, 55
Operating tables (BS 6859), 93
Opto/computer methods applied to the evaluation of a range of acetabular cups, 105
Orthopaedic engineering, 81
Orthoses, modular, 81

Subject Index

Titles of papers are shown in bold type

A comparative evaluation of modern fracture casting materials, 63
A machine for measuring the torsional properties of long bones (Synopsis), 83
A methodology for mechanical measurements of technical constants of trabecular bone, 169
A new generation of artificial hip joints (The Exxon/IMechE Tribology Award Prize Essay), 199
Abdominal muscles, 83
Acetabular cups, evaluation of, 105
Ambulance, air, 139
Analysis, respiratory, 92
Ankle joint, 71
Archimedes Award, 47
Arteries, artificial, 48
Articular cartilage, canine knee, 157
Artificial arteries, 48
Artificial hip joint, a new generation of, 199
Artificial hip joints, functional properties of, 101
Artifical human hand, 143
Artificial leg, 41, 141
Assessment of wear in replacement hip joints, 111
Autophor total hip replacement, 3

Bathing aids, 87
Bearing surface design in total knee replacement, 149
Belfast calf stimulator, 49

Orthosis:
finger, 81
hand, 81
wrist, 81
Osteoarthritis patients, 3
Oxygen sensor, 92
Oxygen transducer for testing respiratory efficiency, 48

Panting in dogs as a model for high-frequency ventilation, 195
Patient monitoring, 91
Permeability properties of the vascular wall, 175
Physical measurements on the greater trochanter, 59
Post-operative gait analysis, 3
Portable therapy unit, 41
Pre- and post-operative gait analysis of hip osteoarthritic patients fitted with ceramic Autophor total hip replacement, 3
Properties of cancellous bone, mechanical, 163
Prostheses, 141
knee, 135
upper limb, 82
Prosthetic devices, evaluation of, 99
Prosthetic hip failure: preliminary findings of retrospective radiograph image analysis, 119
Proteoglycans, 157
Pulsatile flow, 181

Quick-setting denture re-liner, 143

Radiograph image analysis, retrospective, 119
Radiographic determination of the angle of version of the femoral component in total hip replacement, 7
Radiology lectures, 140
Rectal tubes, 50
Rehabilitation and Orthopaedic Engineering (Conference Report), 81
Reinforcement, fibre, of bone cement, 31
Respiratory analysis, 92
Respiratory efficiency, oxygen transducer for testing, 48
Rheumatoid patients, classification of, 17
Robot to help disabled children, 88
Rotational movement of the femoral component of total hip replacements in response to an anteriorly applied load, 127
Rubber components in hearing aids, 44
